

HOW TO ENTER THE VILLA

Usually, we have someone waiting for our guests at the villa who hand delivers the key and gives some basic information about the villa.

Sometimes though, usually when our guests arrive late at night, we use an alternative method. We place the key inside a Portable Key Storage Security Lock and we inform our guests the code prior to their arrival.

1. The Key Storage Security Lock looks like this

2. The Lock is securely attached to the door like this

3. Simply enter the four digit code that you have received prior to your arrival and the face of the lock will unlock and flip down, allowing access to the key inside.

4. When you enter the villa, insert the key fob attached to the key in the slot located in your right as you enter the door. This will turn on the electricity to the villa

Please close and leave the lock on the door. Our staff will pick it up during the next working day.
